

June 17, 2022

Mr. Neil Feinberg  
Sector Policies and Programs Division (E143-01)  
Office of Air Quality Planning and Standards  
U.S. Environmental Protection Agency  
Research Triangle Park, North Carolina 27711

*Submitted via Regulations.gov*

Mr. Feinberg,

The following is the request we made via email on June 15, 2022 for a public hearing. We are submitting this for the docket.

—

We are requesting a virtual public hearing on the proposed rule, “National Emission Standards for Hazardous Air Pollutants: Gasoline Distribution Technology Review and Standards of Performance for Bulk Gasoline Terminals Review” (Docket ID No. EPA-HQ-OAR-2020-0371). Our request is being made in our individual capacities.

Pursuant to the instructions as listed in the notice published in the Federal Register on June 10, 2022, we are making this request to the public hearing team via email at [SPPDpublichearing@epa.gov](mailto:SPPDpublichearing@epa.gov) on or before June 15, 2022.

The proposed regulation could further exacerbate the economic challenges facing American families and businesses who are already dealing with massive inflation throughout the economy. It could also drive-up gas prices at a time when Americans are already dealing with record prices at the pump. A public hearing will afford the EPA an invaluable opportunity to obtain feedback and insight from concerned parties about the implications of the rule and its unintended consequences, among other concerns.

Sincerely,

Daren Bakst  
Senior Research Fellow, Environmental Policy and Regulation  
Center for Energy, Climate, and Environment
