

PAKISTAN

WORLD RANK: **147** | REGIONAL RANK: **32**

ECONOMIC FREEDOM STATUS: **REPRESSED**

Pakistan's economic freedom score is 49.5, making its economy the 147th freest in the 2024 *Index of Economic Freedom*. Its rating is essentially unchanged from last year, and Pakistan is ranked 32nd out of 39 countries in the Asia-Pacific region. The country's economic freedom score is lower than the world and regional averages. Pakistan's economy is considered "repressed" according to the 2024 *Index*.

The government has demonstrated little commitment to much-needed economic reform. Efforts in key areas have been marginal at best. Measures to strengthen the management of public finance and reform outmoded economic structures have met institutional resistance. Property rights are undercut by a judiciary that is susceptible to political interference and corruption. Little progress has been made in improving either the entrepreneurial environment or private-sector dynamism. The labor market remains stagnant. Much of the workforce is underemployed in the informal sector. High inflation has disrupted monetary stability.
