

ACKNOWLEDGMENTS

The Heritage Foundation's annual *Index of Economic Freedom* is the product of collaboration with people and organizations around the world. We wish once again to express our gratitude both to the many individuals serving with various international organizations, research institutions, government agencies, embassies, and other organizations and to the various Heritage Foundation foreign policy experts who provide valuable guidance and assistance throughout the year.

Production of the *Index* would not be possible without many other colleagues at Heritage. Senior Editor William T. Poole continues to bear the primary responsibility for reviewing and perfecting the language we employ, and Manager of Data Graphics Services John Fleming and Data Graphics Designer Luke Karnick created the wonderful charts and graphs that appear throughout the book. Director of Policy Publications Therese Pennefather played a key role in keeping the production on schedule, Manager of Web Development and Print Production Jay Simon was responsible for design and layout of the *Index*, and Senior Designer and Production Manager Amy Baumgardner designed the cover.

The transformation of the *Index* into electronic formats is made possible by the efforts of Jay Simon,

John Fleming, Web Designer Christina Hamm, Director of Marketing Elizabeth Fender, and Customer Data Solutions Architect William Zimmerman.

As always, President of The Heritage Foundation Kevin Roberts, Executive Vice President Derrick Morgan, Vice President of the Kathryn and Shelby Cullom Davis Institute for National Security and Foreign Policy Victoria Coates, and Director of the Margaret Thatcher Center for Freedom Nile Gardiner have been enthusiastic supporters and great sources of encouragement in producing this flagship product of The Heritage Foundation. We are also grateful for the continuing engagement of Heritage Founder Edwin J. Feulner and Senior Counselor to the President and E.W. Richardson Fellow James Jay Carafano in helping us to spread the message of economic freedom around the world.

Finally, we must also express our profound gratitude to the many people who, year after year, rely on the *Index of Economic Freedom* as an authoritative source of data for various research and other purposes. The support and encouragement provided by users of the *Index* around the world remain a major source of inspiration for our ongoing work.
